# Access your data on any device. Anywhere. Anytime

The ApexPortal is a Cloud based solution that allows you full control of your sketching processes and data, providing access to your Apex sketches from Any Device, Anywhere, at Anytime. Eliminate the need to mark up old sketch images only to redraw them in ApexSketch when you get back to the office. With the ApexPortal you can now quickly confirm existing data, make edits live in the field, and easily sync back to CAMA when back in the office.

Enhance your data gathering process and give the ApexPortal a try today!

## THE WEB BASED, CROSS PLATFORM, DO IT ALL SKETCHER

ApexSketch vX (AvX), our newly developed web based sketcher is seamlessly built into the ApexPortal. Modeled after ApexSketch v7 (Av7), AvX allows for a smooth transition and using our Modern drawing paradigm will allow you to create and modify sketches faster and easier than ever before.

Check out just a few of these benefits!

### INTEGRATION

Direct integration with ApexSketch v7 allows for easy "syncing" with CAMA when back in the office.

### OFFLINE SUPPORT

Save, Sync, and Share your data between devices and colleagues. Lose connection? Work in Offline Mode!

### MULTI-USER

In a Multi-User office, each user has their own log-in credentials for easy tracking and management.

### CUSTOM AREA CODES

No more moving Area Code Table files from machine to machine. Upload one time and you are done!

### USE ANY DEVICE

Sketch and share from any of your devices, whether that's iOS, Android, Windows, or MacOS.

### PHOTOS & DATA

Take Photos, Collect Data and automatically transport them to your ApexPortal record for easy retrieval!

### TAGS & TASK LISTS

Quickly create Task Lists to easily track and manage your workload. Tag Sketches for quick lookup and sorting.

### EASY ONBOARDING

Give us a call and we'll help you sign up and get started with your very own ApexPortal today!

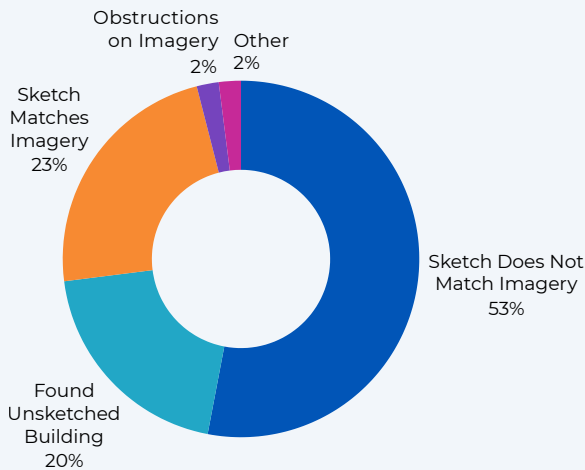

# APEX SKETCH VERIFICATION BRINGS UNRIVALED RESULTS

The only service that can validate your actual Apex sketches by comparing them with current imagery to identify discrepancies. With Apex Sketch Verification, you will receive a georeferenced building layer where each building is scored according to its variance of what actually exists on each parcel, as well as access to software solutions that allow you to efficiently edit / correct those sketches.

## CAN YOU AFFORD TO BE 43% WRONG?

Our experience processing more than 5 million parcels in over 230 jurisdictions has discovered, on average, 43% of the sketch data does not match what's currently on the ground.

### MORE PROFESSIONAL SERVICES

#### Sketch Data Analysis

Apex can run fact-finding tools against your Apex sketches to identify problem areas. We can provide you with the analysis to work the problems yourself or develop a plan to fix them for you.

#### File Conversion

- Legacy sketches to Apex or SHP
- Apex to image format or SHP
- Promote Apex sketches to latest version

#### Sketch Modification

For improved parcels with no sketch data or sketches that need to be modified, Apex will use your imagery to create and/or modify sketches in Apex Software or another CAMA/Sketch system!

### HAVE PAPER SKETCHES?

Let us convert your hand drawn PRCs into fully editable Apex and non-Apex sketches! We'll provide a cost and time effective solution.
