

APEX

Appraisal Solutions

A division of APEX Analytics

 Apex Verified

STREET LEVEL IMAGERY • Authoritative Visual Data for Decision Support

- ✓ Powerful Visual Intelligence for desktop insights, decision support and reduced field visits
- ✓ Auto-extract the single best photo for use within CAMA or online resources
- ✓ Utilize the resource across your organization, parent agencies or key stakeholders

DESKTOP REVIEW • Comprehensive Visual Intelligence

- ✓ Utilize workflow to consume auto-assigned work for any project for desktop review, closure or escalation
- ✓ Comprehensive, synchronized visual resources to inspect, measure, compare or edit your property data quickly and efficiently
- ✓ Perform more tasks at the desktop to generate cost savings, efficiencies and provide a greener environment

WORKFLOW MANAGEMENT • Transform How You Work

- ✓ Create projects, automatically assign work and seamlessly manage remote teams for a streamline process
- ✓ Review project status, monitor progress or get more info via a comprehensive dashboard for informed site visits
- ✓ Management oversight will improve operational efficiencies and help manage workload

MOBILE APPRAISAL • Streamlined editing and field data collection suite

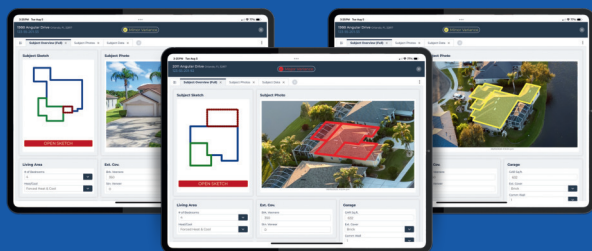

- ✓ Eliminate printing property record cards, duplicate mark ups and rekeying data entry
- ✓ Utilize full editing capabilities, add codes and make the results ready for CAMA.
- ✓ Automatically receive work, operate off or online, generate directions and more.

APEX SKETCH • Industry Standard for all your sketching needs

- ✓ Effortlessly create, edit, and verify professional floorplan sketches in the office or field.
- ✓ Unrivaled accuracy & ease of use with seamless integration back to CAMA.
- ✓ Professional floorplan creation using blueprints or geo-referenced aerial imagery using Photometrics.

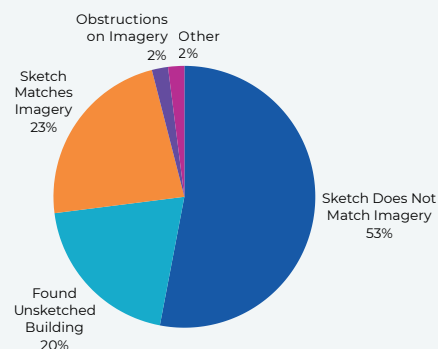

APEX SKETCH VERIFICATION

Apex Sketch Verification is the only service that validates your actual Apex sketches by comparing them against up-to-date imagery to uncover discrepancies. The result is a precise, geo-referenced building layer where each structure is scored based on its variance from what truly exists on each parcel. Once you have your core data-set in place, you can access ApexPortal to efficiently edit, correct, verify, and sync your sketches with CAMA. It just doesn't get any easier.

Can you afford to be 43% wrong?

Our experience processing more than 5 million parcels in over 230 jurisdictions has discovered, on average, 43% of the sketch data does not match what's currently on the ground.

APEX PROFESSIONAL SERVICES

PAPER TO DIGITAL

Let Apex convert your hand drawn PRCs into fully editable Apex and non-Apex sketches! We provide a cost and time effective solution.

SKETCH MODIFICATION

For improved parcels with no sketch data or sketches that need to be modified, we'll use your imagery to create or modify sketches in Apex or another Sketcher.

DATA ANALYSIS

We'll run analysis on your sketches to identify issues and provide the reports you need to resolve them or a plan to fix them for you.

LEGACY TO APEX or SHP

Conversion of legacy sketch file (non-Apex) to ApexSketch file format or SHP (Shape File).

APEX TO IMG or SHP

Conversion of ApexSketch file format to an image format (JPG, PNG, etc.) or SHP (Shape File).

FILE PROMOTION

This conversion will promote older ApexSketch file formats (AX3, AX4, etc.) to the latest Apex format.

APEX SKETCH VERSION X

ApexSketch vX (AvX), our next-generation web-based sketching solution, is seamlessly integrated into ApexPortal. Built on the proven foundation of ApexSketch v7 (Av7), AvX delivers a smooth and intuitive transition for existing users, while introducing a modern drawing paradigm that enables faster, easier sketch creation and editing than ever before.

Explore just a few of the key benefits!

THE web based, cross-platform, do it all SKETCHER

CURVES & ANGLES

Turn, Rise & Run and simple ways to draw Curves are still there as they've always been!

ON-SCREEN TOUCHPAD

No need for a keyboard in the field. Use the touchpad to do everything you need!

FAMILIAR DRAWING

Everything you were used to in previous sketchers is still there and ready in AvX.

CUSTOM AREA CODES

AvX supports all of your Custom Area Codes that you use at your desktop.

APEX SKETCH VERSION 7

ApexSketch v7 (Av7) needs no introduction. It's the same tried and true sketcher that you've always trusted to deliver accurate sketch output. What's new is its role in our entire suite of products where it serves as the conduit back to CAMA from ApexSketch vX and the ApexPortal! Want to know more?

Ask us all about it!
